

alhamdulillah um respected

0:23

professor emeritus that Dr Jamil Osman the chairman of the organizing

0:30

committee um of this um uh Ashan youth camp 2005

0:39

um brother uh associate professor Dr Maana

0:45

Akbar Sha the director of the program um the organizers and the

0:53

participants um first of all I would like to thank the

0:58

organizers for uh inviting me uh to this um uh this um uh youth camp uh as a as a

1:09

keynote speaker and I've been given the title

1:14

um Madani and Mati excellence inshallah in the next 20 minutes or so

1:24

uh I will try to um discuss the topic uh I think the topic is quite um general uh

1:35

it is Madani and Omari A I just want to say here that the uh under my uh

1:43

directorship of the IUM uh we have re-emphasized

1:51

uh the new vision uh for the university namely

1:58

um toic epistemology to epistemology

2:04

uh by which we mean a division of knowledge the vision of unity of

2:11

knowledge the interrelatedness of all knowledge uh the that all knowledge all

2:19

branches of knowledge um are interconnected in a harmonious way uh

2:26

like the branches of a single tree which are beautiful

2:34

now the application of this tahi

2:38

epistemology um is the idea of omatic

2:44

excellence in other words the the idea that um the best um uh and um this is

2:54

precisely what the Quran emphasized um what we mean by um

2:59

excellence is what the Quran refers to uh

3:07

as there is the best of the um that Allah raised for humankind

3:13

um and that's the mission the mission now being emphasized by uh I I

3:23

um but today uh you want me to talk about uh the organizers want me to talk

3:29

about uh Madani and Omati excellence uh actually there's a very close

3:36

relationship uh between Madani uh and uh um

3:43

excellence precisely because the u the Quran

3:50

refers to um the best um uh the most excellent um uh to the first uh

4:00

community of Islam in the city of Medina uh

4:08

Medina Nabi that is the the pro the city the

4:14

city of the prophet Salah um so when uh the prophet and uh some of of his

4:24

companions um basically left Mecca for uh Hijra uh

4:33

to the city of Yasib the city the town of Yasib at the time uh so when the

4:40

prophet sallall wasam arrived uh in Medina in in Yas uh and started

4:47

organizing uh the first community of Islam there uh he changed the name of

4:53

the city uh to Medina which simply means the city um

5:01

now what they did what uh basically what turned out to be was that um that

5:09

community um the community that was um based on the brotherhood and unity of um

5:19

the al- Muhajirun and the Ansar uh the you know this uh the helpers uh those

5:27

who came and those in in Medina uh who welcome the the prophetam and all those

5:35

coming from Mecca uh and uh under the leadership of the prophet sallallahu

5:41

alaihi wasallam the the two the two group uh became united uh under the bond

5:49

of Islamic brotherhood with a common faith with a common uh with a common

5:55

life system and um and a new uh city uh grew the city was developed uh in which

6:05

the uh this ansar and the mahajirun became the backbone uh of the

6:13

new community now there is a very good

6:17

reason why the prophetam changed the name of jat to madina the reason was

6:24

because uh he wanted to create a a new and basically a model uh city city which

6:33

would serve as model uh for uh the whole of mankind for all subsequent

6:41

uh for all subsequent periods in other words um when the when the prophet

6:49

wasallam referred to uh al- Medina al means the city it means that this city

6:58

is the best of all cities that have ever existed in the world and um so precisely

7:07

because the features of this un or the features of this uh city the the

7:13

characteristic of the city the content of city uh which you may call the madani

7:19

so madani refers to the uh the special feature and characteristic of the city

7:28

of Medina um as the Allah himself referred to as the

7:36

best so the best community um built the uh civilization built the civilization

7:45

in in in Medina yeah so it is very important for us to understand this

7:51

historical thing that Allah tala referred the first referred to the first

7:57

Muslim community as the best community the best um ever raised ever created for

8:03

humanity they were yeah so therefore if what it means that uh if we uh later on

8:13

uh in whatever period in which you which we find ourself In what whatever era all

8:19

right whatever the place um the city of Madina the city of the

8:25

prophet will always be our model will is the model which on which we should uh

8:32

base our uh civilization building yeah so the Arabic word madani um you know

8:40

can can be translated as civilized yeah uh madani means to

8:47

versivilized uh to be urbanized uh to basically to um

8:56

describing about the city in which all kinds of uh things but most important

9:01

thing is is that uh place where the civilizational values based on ethic and

9:09

morality um and the prophet wasam uh serve as kind of an our model the leader

9:17

of the community um so therefore there's a very very

9:24

close connection between uh this madani and omatic uh excellence

9:31

uh and the history of Islam especially the history of Islam uh that was

9:38

established in Madina uh that will always be in the minds of Muslims um as

9:44

the we always remind us that is pecially that we would like to

9:49

So what what is the importance about this what are the elements of this

9:53

almighty excellent why why did Allah subhanana wa

9:58

ta'ala prefer uh to the community uh in the Medina as um excellence as the

10:07

excellent community yeah uh or what uh the our philosopher our Muslim

10:14

philosopher thinker Al Farabi uh you know he wrote a book basically called

10:23

al- Madina ala yeah so in other words the virtuous city yeah and and alabi was

10:30

referring in fact to that first community the first city state the first

10:36

nation that the prophetam build yeah so um I would like to speak now for a

10:44

little bit now about the what are these um uh characteristics of omatic uh

10:50

excellence yeah so if we are really sincere we are you know uh that we want

10:56

to create this new uh a new uh country a new society new civilization all right

11:04

so of course the um what happened in Medina uh under the

11:13

leadership of the prophetam the first uh great transformation uh of the city uh

11:21

was uh a spiritual transformation uh in other words uh before the prophets

11:28

before the the birth of Madia the the the city of the prophet

11:35

Um what what existed was uh people worship idols i mean there was there was

11:42

paganism there was no politism uh the people uh only only a

11:48

few people really uh concentrate paid proper attention

11:55

to the unity of Allah so the prophet sallallam know came of

12:04

course he did already in Mecca for 13 years in Mecca the prophets

12:11

already established the uh that the foundation of Islamic Islamic life in

12:18

other words um the prophetam uh already established the

12:25

ideological uh foundation of the Muslim group uh in the Mecca yeah um but and so

12:35

uh with the uh the faith or rather with the uh worldview the worldview of the

12:42

Muslims who became or the the the followers of the prophet who became

12:47

Muslim in uh uh who became Muslim in Mecca so but in Medina uh the uh the the

12:58

is question of building a new society a new community

13:03

uh yeah a new civilization um on the basis of the uh belief system

13:10

that the prophet sallallahu alaihi wasallam had planted uh in the minds

13:15

yeah uh of the uh followers of followers of the prophetam so uh the first

13:23

important transformation uh the and I will call the madani

13:28

transformation the first real Madani transformation

13:33

that happened in the city of the prophet Salam was the belief in the oneness of

13:38

which is basically uh the first article of aranul the first article of uh the

13:46

the Islamic faith and uh also uh the first pillar of Islam uh which is

13:57

basically so that witnessing of the truth of the unity of the of Allah and

14:07

of course the uh the second part of the shahada the acceptance of the

14:13

prophetam as the the last prophet the last messenger and this is I would say

14:21

what what I call practical practical in other words how

14:26

to translate uh this uh at the human level at the level of human life uh

14:33

that's why the pro the Allah uh provide man in the um made the

14:40

prophetam as the uh the human personification the human

14:46

personification of uh if we want to see in action then we

14:53

just need to just look at the life of the prophet sallallahu alaihi wasallam

14:58

yeah so that is the first uh transformation madani uh transformation

15:04

now the second Madani trans the second Madani uh

15:09

transformation is really about the uh about the the ethics and morality of the

15:18

community which is based upon the Sharia based upon the divine law because the

15:23

Quran provides rules and regulations how the community can lead a noble life a

15:31

clean life a moral or life as exemplified by the prophet sallallahu

15:36

alaihi wasallam himself yeah so and that brings about the transformation in the

15:42

ethical system in the legal system is a new law it is community with a new

15:48

system of law how to guide the community uh to be to be safe to be you know to be

15:56

knowledgeable to be progressive uh and and and so on yeah so

16:01

madina the the second madani transformation is transformation in the

16:06

field of knowledge in the field of ethics uh and and and and morality

16:11

now the third transformation u which is very relevant to our situation in the

16:16

world today is that uh Medina was pluralistic uh city there were Arabs

16:26

there were Arabs of various tribes there were Jews of various tribe there were uh

16:31

other there were Christians and also you know there were politics uh you know the

16:36

mushikun the mushikun uh so the ther and which became was um a

16:47

multi-ethnic multi-religious community and the

16:51

prophet was very much aware of that of that pluralism of the city and and that

16:58

came to the problem of how to unify uh the city and that's why he um invited he

17:05

had a dialogue he conducted a dialogue with leaders with Christian leaders

17:09

Jewish leaders leaders of the unbelievers all right but uh he invited

17:15

them to become the citizens the war nagara am to become citizen with him as

17:22

leader all right And um this is what uh he did so and that produced the the

17:28

famous uh Madina constitution the piagam madina in other words that Madina

17:35

constitution was the first written constitution in the world uh so so the

17:41

the prophet invited all others to be the members of that so this is very this is

17:46

precisely what many countries today are trying to do how to unify how to uh how

17:52

to unite um a community comprising people of different beliefs or different

17:57

practices cultures and and and so on so uh the prophetam clearly showed that

18:03

under the new revelation and the new teachings of Islam it is possible to

18:08

create a peaceful society in which people of different faith uh can live

18:14

together and and collaborate and based on the principle of tahum understanding

18:22

principle of acquaintance and the the principle of

18:29

uh which is cooperation and collaboration i think this is roughly uh

18:34

know what basically what I wanted to say regarding the topic it it is a large

18:39

topic it's a very broad topic but at least I want to bring out some of the

18:43

highlights characteristics of this very very important topic and what Malaysia

18:50

did what Dr to Sri An Ibrahim the current prime minister of Malaysia has

18:55

done is to select a very important part of the philosophy of Medina and apply it

19:01

and apply it to Malaysia and then he came up with the six uh pillars of of

19:07

that so we are very thankful that this ancient teaching this old teaching of

19:13

Islamic philosophy of Islamic social philosophy is being introduced as

19:19

something practical uh in the in what what is comprised under the concept of

19:25

Malaysia Mandani thank you asalam alaikum
