

Instance troubleshooting results

Instance name: devops-server

Instance OCID: ocid1.instance.oc1.ap-sydney-1.anzxs1jr2geuxacvja2bmejklqjggzqljjdy4drmoxezhhvgeisljmbczda

Timestamp: Mon, 15 Apr 2024 13:35:40 GMT

Issue: OS is still booting

Recommendation:

A running status reflects the status of the instance, not the operating system on the instance. If you just created the instance, wait a few minutes to give the OS time to finish starting.
